

THAILAND

RMNCAH Factsheet December 2020

World Health Organization
REGIONAL OFFICE FOR South-East Asia

Basic indicators

Demographic	Value	Year of data
Total population ⁶⁵	69 800 000	2020
Total under-5 population ⁶⁵	3 596 000	2020
Total adolescent population (10–19 years) ⁶⁵	8 492 000	2020
Women in reproductive age group (15–49 years) ⁶⁵	17 177 000	2020
Annual number of births ⁶¹	707 000	2019
Total fertility rate (births per woman) ⁴¹	1.4	2019
Adolescent birth rate (per 1000 women aged 15–19 years) ⁴¹	23	2019
Births registered (%) ⁴¹	100	2019

- Under-5 population **5%**
- Total adolescent population **12%**
- Women in reproductive age group **25%**
- Total fertility rate **1.4**
- Adolescent birth rate **23 per 1000 population**
- Births registered **100%**

Country profile	Value	Year of data
GNI (PPP) per capita ⁶³	18 520	2019
Percentage of population below international poverty line ²⁶	0	2018
Percentage of population using safely managed sanitation services including a handwashing facility with soap and water	NA	NA
Improved sanitation ⁴¹	100	2019
Handwashing facility with soap and water ⁴¹	89	2019
Percentage of population using safely managed drinking water services ⁴¹	100	2019

Impact indicators

Maternal mortality ratio (per 100 000 live births)

- **14% reduction in MMR between 2000 and 2017**

Source: ⁴⁸Trends in maternal mortality 1990 to 2015: estimates by WHO, UNICEF, UNFPA, World Bank Group and the United Nations Population Division
⁵⁸Trends in maternal mortality 2000 to 2017: estimates by WHO, UNICEF, UNFPA, World Bank Group and the United Nations Population Division
1.6% annual rate of reduction between 2010 and 2017 and the assumption that all things will remain as in 2017 considered for calculating the 2030 projection number for maternal mortality ratio

Neonatal mortality rate (per 1000 live births)

- **75% reduction in neonatal mortality rate between 1990 and 2019**

Source: UN Inter-Agency estimates: Levels and Trends in Child Mortality: Report 2020 (UN IGME 2020)
4.0% annual rate of reduction between 1990 and 2019 considered for calculating the 2030 projection number for neonatal mortality rate

Under-5 mortality rate (per 1000 live births)

- **76% reduction in under-5 mortality rate between 1990 and 2019**

Source: UN Inter-Agency estimates: Levels and Trends in Child Mortality: Report 2020 (UN IGME 2020)
4.9% annual rate of reduction between 1990 and 2019 considered for calculating the 2030 projection number for under-5 mortality rate

- **Stillbirth rate (per 1000 births) is 6⁶⁰**
- **Adolescent mortality rate (deaths per 100 000 adolescents) is 9⁶⁰**

Source: ⁶⁰UN IGME database 2019

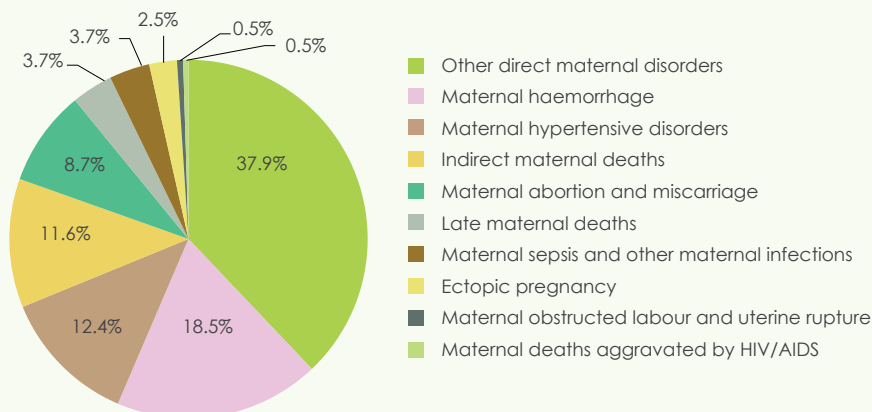

Nutrition indicators

- **Prevalence of LBW increased from 9% to 11% between 2015-2016 and 2019**
- **Stunted under-5 children increased from 11% to 13% between 2015-2016 and 2019**

Source: ³⁹Multiple Indicator Cluster Survey 2015-2016 | ⁴¹Multiple Indicator Cluster Survey 2019 | ⁴⁷The State of the World's Children Reports 2019

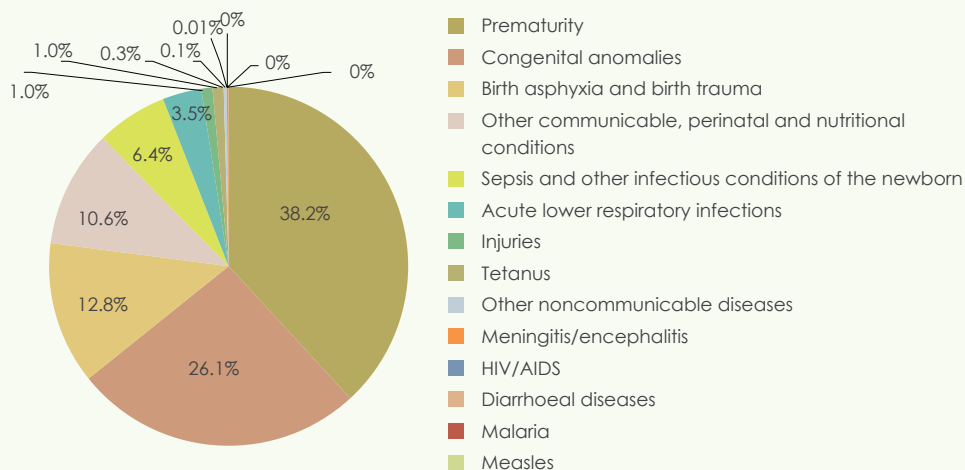

Causes of maternal deaths

- Proportion of direct maternal deaths decreased from 86% to 84% between 2015 and 2019

Source: ¹⁴Global Burden of Disease study 2019

Causes of newborn deaths

More than 3600 newborns died in the first month of life mainly due to:

- prematurity
- congenital anomalies
- birth asphyxia

Source: ²⁵Global Health Observatory - World Health Organization 2017

Causes of under-5 deaths

More than 6700 under-5 children died, mainly due to:

- newborn causes
- pneumonia and diarrhoea
- infections

Source: ²⁵Global Health Observatory - World Health Organization 2017

Causes of adolescent deaths

Top 5 causes of adolescent deaths

RMNCAH policy survey

Presence of key national policy/guidelines on SRMNCAH at the national level	(Y/N)
On family planning/contraception ⁴⁵	●
On sexually transmitted infections diagnosis, treatment and counselling ⁴⁵	●
On comprehensive national cervical cancer prevention and control ⁴⁵	●
On antenatal care ⁴⁵	●
On childbirth ⁴⁵	●
On postnatal care for mothers and newborns ⁴⁵	●
On management of low birth weight and preterm newborns ⁴⁵	●
On child health and development of children ⁴⁵	●
On early childhood development ⁴⁵	●
On integrated management of childhood illness ⁴⁵	●
On management of childhood pneumonia ⁴⁵	●
On management of childhood diarrhoea ⁴⁵	●
On management of malaria with appropriate recommendations for children ⁴⁵	●
On management of acute malnutrition in children ⁴⁵	●
On adolescent (10–19 years) health issues ⁴⁵	●
Multisectoral plan of action for violence against women ⁴⁵	●
On CAC/post-abortion care ¹⁵	●

● Yes ● No

Coverage indicators

Sexual, reproductive and maternal health

- 90% received 4+ ANC visits during last pregnancy
- 99% institutional deliveries
- 99% deliveries attended by skilled health personnel
- 5% increase in C-section between 2015-2016 and 2019
- More than 50% but less than 70% women aged 30-49 were screened for cervical cancer⁶⁶

Equity in coverage

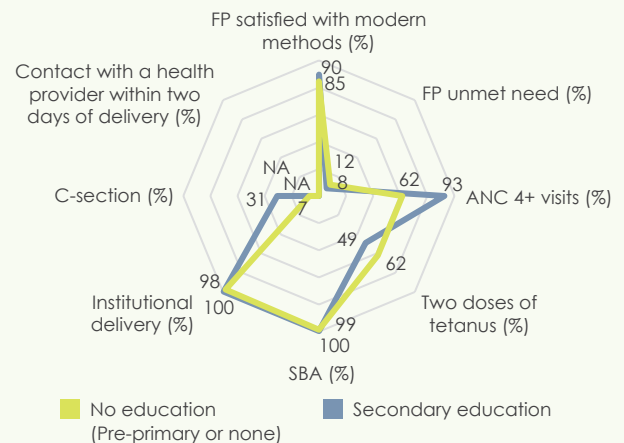

By wealth

By geography

By maternal education

Source: ⁴¹Multiple Indicator Cluster Survey 2019

Newborn health

- **8% newborns got skin-to-skin contact in the first hour of life**

Source: ³⁹Multiple Indicator Cluster Survey 2015–2016 | ⁴¹Multiple Indicator Cluster Survey 2019

Child health and development

- **15% increase in children getting full immunization between 2015–2016 and 2019**
- **94% got measles vaccination**
- **92% introduced semisolid or soft foods at 6–8 months**

Source: ³⁹Multiple Indicator Cluster Survey 2015–2016 | ⁴¹Multiple Indicator Cluster Survey 2019

Adolescent health and development

Health system indicators

Health financing

- Out-of-pocket health expenditure is decreasing

Source: ¹⁷Global Health Expenditure database 2015 | ¹⁸Global Health Expenditure database 2018

Health workforce

- **28 per 10 000 population availability of doctors, nurses, midwives versus 44.5 per 10 000 recommended in Global Strategy²³**
- **28 per 10 000 population availability of midwives and nurses versus 18 per 10 000 population in the South-East Asia Region⁴⁴**
